DETAILED ACTION

1. The following is an examiner's statement of reasons for allowance. In interpreting the claims, in light of the specification and the applicant's amendments and remarks filed 11/26/2008, the Examiner finds the claimed invention to be patentably distinct from the prior art of record. The prior art does not teach receiving a request from a first system for a lease time modification privilege at a daemon of a DHCP server, where the first system is an installation server for installing software on a dynamically configured system, and where the first system sends a modify packet which requests an extension of a lease time for the dynamically configured system as required by the claims of the present invention. In contrast to the prior art, the present invention teaches receiving a first modify packet from a first system by a daemon of a DHCP server which manages a stored configuration file specifying a dynamic internet protocol (IP) address for a dynamically configured system, wherein said first modify packet requests an extension of a lease time of said dynamic IP address for said dynamically configured system for a duration of an installation on said dynamically configured system by said first system. The limitations of the independent claims are allowable subject matter of the prior art, in light of the specification.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Claims 1, 5, and 20 are allowed.

Conclusion

Any inquiry concerning this communication should be directed to Glenton B. Burgess at telephone number (571) 272-3949.
